In Time: 9:00 am	Out Time: 3:00 pm

Work Done:

- Introduction to PHP scripting.
- Practiced writing dynamic content with `echo`, variables, and simple operations.
- JavaScript Control Flow: if/else, switch, for/while loops.

Sign:

Day- 6	Date: 7/6/2025
In Time: 9:00 am	Out Time: 2:30 pm

Work Done:

- Studied PHP conditional statements and loops.
- Created a simple grade calculator using if/else and switch in PHP.
- JavaScript DOM Manipulation: Accessing elements (getElementById, querySelector), changing content (innerHTML, textContent), modifying attributes.

Sign:

Day- 7	Date: 9/6/2025
In Time: 9:00 am	Out Time: 2:30 pm

Work Done:

- Introduction to HTML forms and PHP form handling.
- Created a login form and captured input using $_POST.
- JavaScript Events: onclick, onmouseover, onchange. Event listeners.

Sign:

Day- 8	Date: 10/6/2025
In Time: 9:00 am	Out Time: 2:30 pm

Work Done:

- Introduction to PHP Forms: handling form submissions (_POST, _GET), form validation (server-side).
- Connected PHP with MySQL using MySQLi.
- Performed data insertion and displayed database content on a page.

Sign:

Day- 9	Date: 11/6/2025
In Time: 9:00 am	Out Time: 2:30 pm

Work Done:

- Working with uploaded files in PHP (e.g., images).
- Designed a student registration form with validation.
- Stored form data into MySQL and displayed a success message.

Sign:

Day- 10	Date: 12/6/2025
In Time: 9:00 am	Out Time: 2:30 pm

Work Done:

- Introduction to PHP OOP (Object-Oriented Programming). Classes, Objects, Properties, Methods, Constructors, Destructors.
- Introduced Bootstrap framework for mobile-friendly UI.
- Recreated the student registration form using Bootstrap layout.

Sign:

Day- 11	Date: 13/6/2025
In Time: 9:00 am	Out Time: 2:30 pm

Work Done:

- PHP OOP continued: Inheritance, Access Modifiers (public, private, protected).
- Explored CSS transitions and hover effects for interactive design.
- Styled buttons, navigation bar, and form elements.

Sign:

Day- 12	Date: 14/6/2025
In Time: 9:00 am	Out Time: 2:30 pm

Work Done:

- PHP OOP advanced concepts: Interfaces, Traits, Static properties and methods.
- Learned about PHP functions and code reusability..
- Understood how to make HTTP requests from the browser without page reload.

Sign:

Day- 13	Date: 16/6/2025
In Time: 9:00 am	Out Time: 2:30 pm

Work Done:

- Working on a structured project (Product Management System). Focused on Product CRUD operations.
- Built a calculator using HTML + JS.

Sign:

Day- 14	Date: 17/6/2025
In Time: 9:00 am	Out Time: 2:30 pm

Work Done:

- Product Category management ,Linking products to categories.
- Structuring the project with separate files for different entities.
- Created a separate CRUD for categories and established relationships with products (foreign keys).

Sign:

Day- 15	Date: 18/6/2025
In Time: 9:00 am	Out Time: 2:30 pm

Work Done:

- Refinement and error handling in the Product Management System. Implementing basic UI improvements using Bootstrap.
- Adapting existing HTML to Bootstrap components.

Sign:

Day- 16	**Date: 19/6/2025**
In Time: 9:00 am	Out Time: 2:30 pm

Work Done:

- Initiated the integration of a new HTML theme/template. Focused on adapting the static HTML structure and CSS of the chosen theme to work with dynamic data output from PHP. Specifically worked on integrating the theme's header and navigation components with backend logic.
- Deeper dive into JavaScript: Understanding async/await for cleaner asynchronous code, error handling with try...catch.

Sign:
